

**Hunters Point Naval Shipyard Superfund Site
Update on Discussions with Navy | Radiological Remediation Goals for Buildings
Internal EPA Briefing, February 1, 2021**

Schedule for the next two weeks (Yolanda)

- Friday (2/5), 10 am meeting with headquarters (FFRRO, OSRTI, and FEO)
- Monday (2/8), 4 pm pre-briefing for you with site team
- Thursday (2/11), 3 pm meeting the Laura Duchnak with the Navy (tentative)

Summary of recent Navy submittals on background values and status on RESRAD Builds vs BPRG calculator conversation (Wayne)

- Laura's latest emails on January 22 and January 27 sent or referred to background data
- Both emails referred to coordinating with the FFA signatories on an early February meeting

Recommended approaches to respond to Laura's emails (John)

Goals for our meeting with HQ on Friday (Yolanda)

- In December, we asked for Superfund site examples where the BPRG calculator was used or where RGs have been set to address radiologically contaminated buildings for residential use
- In January, we asked whether HQ to verify the default values (four exposure factors) in the BPRG calculator to estimate cancer risk from removable radiological contamination (i.e., dust)

Prepared by Yolanda Sanchez on 12/12/2019
